

SENSI WEEKLY UPDATE

Dear Sensi Community,

Welcome to Edition Forty Six of the Sensi Weekly Update series. We hope everyone has had a great week! As usual, included in this week's SWU are the typical features. Data captures, community recognition statistics, leaderboards, development update tidbits, etc.

Without further adieu...

LEADERBOARD

Second Place | 39-Week Streak

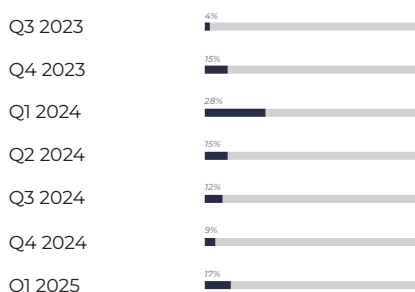

Pedrovski

Third Place | 10-Week Streak

WEEKLY POLL

07.10 - 07.17

What is your guess in which SENSI will hit a price of \$0.50? (Final Votes)

DEVELOPMENT UPDATES

SMARTYIELD

This week, the Sensi Development Team focused on two small but important bugs, regarding the deposit function. The rebalancer was throwing an error, and the bugs have been located and resolved. This hotfix is currently undergoing internal testing prior to being sent out in the 5th development build of SmartYield.

SY ALPHA

Once again, another great week of testing SmartYield! This marks our first week of testing with our second community member, Yenix, who has given us excellent feedback (and hopefully is enjoying it!). Yenix and K have been instrumental to our testing, and we look forward to dev build 5!

GENERAL

All in all, a very successful week for the Sensi Team. As noted above, we were able to squash two pesky but important SmartYield bugs, begin internal testing on those bugfixes, all whilst receiving an overwhelmingly helpful amount of feedback both backend-wise, but also frontend-wise with the dApp's user interface. Furthermore, the development team has also rearranged some internal roles to delegate resources towards fixing minor copywriting flaws and other areas for improvement on our main website.

SEE YOU NEXT WEEK!

This concludes Edition Forty Six of the Sensi Weekly Update. We hope that this update has found you well, and we look forward to seeing you again next week! We wish you all a great rest of your week :)

- The Sensi Team
