DEVELOPMENT UPDATES

SMARTYIELD

A ton of new SmartYield improvements for this week, including but not limited to; Multiple UI fixes, SY options split into "Overview and Deposits", Web3CTX Controller fixes, SY overview + SY deposit pages have been cleaned up, added a new line on the dashboard for smart contract allowance, major MP updates, and more!

SY ALPHA

The latest update round of SmartYield Alpha has gone live today, and there already is a great host of feedback from our team and testers. This update includes all of the above noted improvements + quite a few other new undisclosed features :)

GENERAL

Overall, all focus has been on pushing out the latest SmartYield Alpha to the wider team and testers. The alpha group was eager to get their hands dirty in the newest version, and have once again put forth a great amount of improvement suggestions, as well as trying their hardest to break it! So far so good, and undoubtedly this is the best SmartYield version yet!

SEE YOU NEXT WEEK!

This concludes Edition Forty Eight of the Sensi Weekly Update. We hope that this update has found you well, and we look forward to seeing you again next week! We wish you all a great rest of your week :)
