

# SENSI WEEKLY UPDATE

Dear Sensi Community,

Welcome to Edition Fifty One of the Sensi Weekly Update series. We hope everyone has had a great week! As usual, included in this week's SWU are the typical features. Data captures, community recognition statistics, leaderboards, development update tidbits, etc.

Without further adieu...

## WEEKLY POLL

### 08.21 - 08.28

No weekly poll for this week, perhaps we shall dedicate this week towards giving Lev a hard time about it? ;)

## DEVELOPMENT UPDATES

### SMARTYIELD

We're back! The Sensi team is back in full swing again after a nice short period of time off. We put our initial workflow into internal testing of some small but annoying backend bugs on the 25th. Following this, we also were able to get right into the implementation of some shiny new features within the dApp/SY. Maybe some screenshots are in order this week? ;)

### SY ALPHA

Round 5 of the latest SY test build has been sent out to our testing team as of 7 hours ago. We will fill you all in on it's status after a few days of testing — keep an eye out for it in next week's SWU!

### GENERAL

Overall, as noted above, the majority of this week's work has been focused on squishing a few little bugs, and implementing a wide host of new features into SY and the dApp. Some large UI changes and page additions were implemented also, as well as the inclusion of charts for each vault in which metrics are gathered from PCS via GraphQL to provide data for a large variety of features within the Sensi dApp.

## SEE YOU NEXT WEEK!

This concludes Edition Fifty One of the Sensi Weekly Update. We hope that this update has found you well, and we look forward to seeing you again next week! We wish you all a great rest of your week ;)
