SENSI
WEEKLY UPDATE

Dear Sensi Community,

Welcome to Edition Fifty Five of the Sensi Weekly Update series. We hope everyone has had a great week!
As usual, included in this week's SWU are the typical features. Data captures, community recognition statistics, leaderboards, development update tidbits, etc.

Without further adieu...

DEVELOPMENT CHANGELOG

SMARTYIELD *v0.90*

`Changes`

Web3CTX
- *Generic*: added additional function to "translate the smart contract address into real names
- *Dashboard*: added a top 10 doughnut diagram about SENSI holders
- *Dashboard*: added another column next to the investor metrics which fits better for the SENSI + SY metrics
- *Dashboard*: deleted the first lines of metrics & cleaned the dashboard a little bit
- *Dashboard*: added a new loading circle to each field
- *NewsPage*: added a new loading circle to each field
- *NFTMarketplace*: added a new loading circle to each field
- *SYPageDeposits*: added a new loading circle to each field
- *SYPageOverview*: added a new loading circle to each field
- *SYPageInvestments*: added a new loading circle to each field
- *SYPageInvestments*: added a BNB wallet balance indicator to the "add funds" window in the right corner
- *SYPageInvestments*: added a filter for withdrawing funds or not - now to see these options, the user has to check the box to open withdrawal functions
- *SYPageInvestments*: added a new indicator within the "add funds" window for the resulted addition funds for the NFT. Thus, the investor understands how much there will be at the end added to the total funds of that NFT.

DEVELOPMENT CHANGELOG *(CONTINUED)*

SMARTYIELD *v0.90*

`Bug Fixes`

Frontend
 - *SYPageDeposits*: fixed a wrong fee from 1.5% to 7% (this includes all infrastructure + service + team costs)
 - *SYPageInvestments*: after the transaction for adding funds to the existing NFT is finished, the number in the
   [add funds to nft] field is set back to zero
 - *Generic*: minor bug fixes of the layout

Smart Contract
 - *NFTMarketplace*: fixed a bug which led to an error on calling the getallNFT function. Issue was that the internal used array
   was not updated, thus the needed "sold-flag" was not updated anymore. That led to ownership error, etc.

SMARTYIELD *v0.94*

`Changes`

Web3CTX
 - *Generic*: added a multi-language component i18next to reduce the language barrier within Sensi ;)

Frontend
 - *Dashboard*: changed the order of the sensi/investor metrics
 - *NFTMarketplace*: added a max-button next to the OTC buy field - similar to the locking page
 - *SYInvestmentsPage*: added an additional target redemption date to the locking screen and ist redeem function
 - *Dashboard*: implemented the i18next components

`Bug Fixes`

Frontend
 - *SYInvestmentsPage*: fixed an issue in the extend feature of SENSI locking - showing not the relocked value instead
   just the previously locked amount
 - *SYDepositPage*: removed the suffix BNB from the numbers to avoid further errors
 - *Generic*: removed the light scheme due to the unusual layout and look until it is repaired
 - *NFTMarketplace*: fixed a decimal error in the OTC window offering
 - *SYInvestmentPage*: clarified the usage of the normal and emergency withdraw process via an additional tooltip
 - *Dashboard*: fixed a wrong parameter on the allowance status screen. Now the correct names are displayed
 - *SYInvestmentPage*: fixed the glitch of the add funds buttons - result was an overlapping of the input fields
 - *NFTMarketplace*: fixed a blackout bug which let the investor not reload the page directly.
 - *NFTMarketplace*: rearranged the OTC placement & focused on the manual step for setting the total BNB
 - *NFTMarketplace*: a wrong tierlevel was generated out of the image generating process, and due to that the SY-NFT
   was shown incorrectly. The data taken out of the metadata was changed now, and even if the image is faulty, the
   raw data underneath is not
 - *NFTMarketplace*: fixed the datatables within the NFT + OTC windows
 - *StatusMessage*: fixed the resizing bug - now the window will be kept in it's width
 - *SYDepositPage*: fixed the "millisecond-tierlevel-switch" bug and made sure that the tierlevel cannot change before
   creation anymore.
 - *SYInvestmentPage*: fixed a wrong height of the withdrawal and auction boxes - now set to a fixed dimension

SEE YOU NEXT WEEK!

This concludes Edition Fifty Five of the Sensi Weekly Update. We hope
that this update has found you well, and we look forward to seeing you again
next week! We wish you all a great rest of your week :)

 - The Sensi Team
