

SENSI WEEKLY UPDATE

Dear Sensi Community,

Welcome to Edition Sixty-one of the Sensi Weekly Update series. We hope everyone has had a great week! As usual, included in this week's SWU are the typical features. Data captures, community recognition statistics, leaderboards, development update tidbits, etc.

Without further adieu...

LEADERBOARD

COMMUNITY

- Lev**
First Place | 32-Week Streak
- K_Sensi_fan!**
Second Place | 1-Week Streak
- Simon Ritsel**
Third Place | 1-Week Streak

BI-WEEKLY POLL

Which time period(s), plan(s) would you prefer for Sensi Locking?

- 1 day 5 votes
- 7 days 9 votes
- 14 days 14 votes
- 30 days 32 votes
- 60 days 19 votes
- 90 days 22 votes
- 180 days 18 votes
- 360 days 18 votes

Maybe 14,30,90,180,360 are reasonable? Seems like 1 and 7 days are not preferred!

DEVELOPMENT CHANGELOG

SMARTYIELD v1.01

SNEAK PEAK??

More sneak peeks to come!

ACTIVE SMARTYIELD / NFTv1 / NFTv3 INVESTMENTS (in total #1)

SY-NFT-ID: 8 | TIER LEVEL: 1 | INIT. BNB DEPOSIT: 0.2425 BNB | INIT. SENSIBALANCE DEPOSIT: 12,445 SENSIBALANCE | CURR. DEPOSIT: 0.2425 BNB | YIELDS: 8.29 SENSIBALANCE | LATEST YIELDS: 1.17 SENSIBALANCE

Actions for SY-NFT-ID #8

ADD FUNDS / WITHDRAW SHARES

ADD FUNDS TO SY-NFT: 0.01 | ADDITIONAL DEPOSIT (MINUS FEES): BNB 0.010

BNB-BALANCE 1.7242 BNB

BASE SHARES: 100 % of Base Shares (56,332 USD)

YIELD SHARES: 100 % of Yield Shares (8,295,536 SENSIBALANCE)

WITHDRAW

OFFER / AUCTION ON NFT MARKETPLACE

SY-NFT OFFER:

New marketplace price (SENSIBALANCE): 1

CREATE OFFER

SY-NFT AUCTION:

Minimum start price (SENSIBALANCE): 1

End of auction:

CREATE AUCTION

Changes:

Web3CTX

- generic: removed unnecessary codelines
- generic: improved the overall performance by removing redundant calls & instances.
- generic: added the Locking v3 contract functions.
- generic: updated the code to implement the new SENSINFTV3 generation

Frontend

- NFTMarketplace: added a pre-check if a valid amount was set. if zero then the buy button will disappear.
- overall: more mobile UI optimization.
- LockingPage: complete rewrite of this page with more additional information now.
- LockingPage: included the new v3 Locking Contract functions + precheck if the max limit of locks was reached.
- SYPageInvestments: added the claim rewards button to each Lock ID.

Backend

- SYManager: integrated a new dynamic NFT-Booster function to be more flexible regarding new SENSIBALANCE NFTs in future (these include the new SENSINFTV3 generation)
- SENSINFTV3: created a complete new SENSIBALANCE NFT v3 generation updated out of SENSIBALANCE NFT v1 (with a lot of learnings from the SY-NFT v3) to create more flexible NFTs in future
- SENSINFTV3: included a vesting logic into the NFT itself to get rid of a separate vesting contract. We can also dynamically fit the cliff/vesting period + saletoken (e. g. from BUSD to USDC)
- Lockingv3: added the possibility to claim rewards while the lock is still closed
- Lockingv3: added the NFT Bonus as a second multiplier to the standard reward rate + the bonus for longer periods.
- Lockingv3: added a limit of maximum lockable amounts per wallet address to avoid too huge whale benefits.

Bug Fixes:

Frontend

- SYPageDeposits: fixed the flickering-bug of the fields which was caused by a zero balance wallet
- SYPageInvestments: fixed a wrong used fee number in the pre-calculation of the taxes
- NFTMarketplace: fixed a wrong used sensibalance amount for gathering the tier level of OTCs. Previously a wrong tier level was chosen then. That was due to the new dynamic tier level adjustment.
- Changelog: fixed a bug of the easter egg function which led to characters which were 'over the window' border and would lead to an infinite loop
- NFTMarketplace: fixed the internal used logic of calculation for the OTC amounts
- SYPageInvestments: fixed a wrong shown floating number within the progressbar for fulfilled OTCs
- SYPageInvestments: removed the possibility to create decimal numbers in the amount fields of SY-NFTs for auction and offers
- NFTMarketplace: removed the possibility to create decimal numbers in the amount fields of OTCs

Backend

- NFTMarketplace Contract: fixed an issue of insufficient allowance created by a special constellation in the buy/cancel process of OTCs
- All Smart Contracts: updated all smart contracts to the newest solidity compiler 0.8.2

SEE YOU NEXT WEEK!

This concludes Edition Sixty-one of the Sensi Weekly Update. We hope that this update has found you well, and we look forward to seeing you again next week! We wish you all a great rest of your week :)

- The Sensi Team
